PAINT SYSTEMS GLASS FIBRE REINFORCED POLYESTER CABINETS

Jean Müller New Zealand Ltd has since 2017 painted all cable distribution cabinets KVS, KVSL & FP as an improvement and to maximise their longevity, suitability in the field for the NZ & Pacific environment.

The initiative was developed by the NZ team over many years after consultations with a number of customers and local NZ paint application specialists.

The paint system is applied by a professional automotive paint applicator and within a controlled spray booth environment.

The standard colour is RAL 7035, which closely matches the unpainted standard cabinets colour. Alternative colours are available such as Green

The immediate benefits to the end user include, high gloss finish, easier to remove graffiti, UV degradation slowed, Colour options, aesthetically pleasing finish. And best of all there be no additional cost for standard paint system (*as below*) and colour Grey and Green. Also painted stock will be available (*subject to prior sale*).

In addition touch up and retro painting in field kits are available.

THE PAINT SYSTEM - PAINT TYPE

Undercoat : DuPont 840R VOC Epoxy Primer Surfacer. (Sealer) 2-pot.

**Overcoat : Imron PUR Urethane (Grey) or Nason Acrylic (Forest Green) 2-pot.
(Other colours available upon application)**
